

Storage and Project Cargo Centres

kemball.co.uk

Foreword

Our Container and Project Cargo facilities provide off dock storage capacity in port-centric locations across UK and Europe. Our transport and warehouse facilities offer 650,000 sq ft of ambient storage and 100,000 of cold storage.

Our UK and international depots have in excess of 11,600 TEU loaded and empty container capacity. We can facilitate all your cargo needs using our sites in Felixstowe, Ipswich, Southampton, Tilbury and Rotterdam.

Our strategic plan is to add value to our customers and provide professional, bespoke services to streamline their supply chain and reduce cost.

We continue to invest in the newest and highest quality Eco equipment, providing intelligent freight management and transport services.

CONTAINER STORAGE FACILITY

We provide retailers, shipping lines and freight forwarders with a container storage solution that boasts state of the art facilities and outstanding customer service at key locations throughout the UK and Europe.

- With access to all major road networks, our facilities are situated in prime locations for all of your storage requirements.
- Our container holding depots provide storage capacity that is supported by modern container handling equipment and fully qualified and accredited operators.

SECURITY

We understand the importance of ensuring the safety and security of your cargo. We have invested heavily in high level security including CCTV, fencing and 24/7 manned security patrols.

We use state of the art IT systems and are committed to taking all measures possible to prevent IT security incidents. We maintain and test our Business Continuity Plan and provide appropriate information, instruction and training to all staff members to ensure they are aware of their responsibilities.

HEALTH & SAFETY

We regard the management of Health & Safety as an integral part of our business and is designed to contribute to improving business performance. Our policy is to ensure that all activities and work carried out will be in a safe manner and our target is for zero accidents by applying best practice in H&S management. Our employees receive suitable and sufficient training to ensure they are aware of the safe working practices and can carry out their job safely.

ETHICS & ENVIRONMENT

As a socially responsible company, James Kemball promotes policy statements outlining our environmental and ethical aims.

ETSF

We offer distinctive benefits to our customers, such as expedited deliveries achieved by strategically locating goods closer to customers. Our secure and compliant storage facility allows customers ample time to manage customs duty payments while their goods are safely stored. This unique approach empowers customers to defer tax payments until the moment of sale, providing convenient access to their goods.

SHUNTING SERVICES

Our shunting services streamline logistics, enhancing efficiency in cargo transportation. We expertly manage the movement of containers, optimising yard operations. This results in a seamless transfer of goods, reducing transit times and ensuring timely deliveries. Trust us for agile shunting solutions that keep your supply chain in motion.

OUT OF GAUGE

Our cargo team are dedicated to handling all types of OOG and project cargo, tailored to meet your specific needs.

The Project cargo centres are also able to offer devanning, repacking and cross docking solutions.

We are able to offer competitive rates for all your project cargo needs.

Our expertise extends to managing end to end projects specialising in over height and overweight cargo.

CARGO CENTRE
IPSWICH

West Bank Terminal
ABP, Ipswich IP2 8LY

CARGO CENTRE
FELIXSTOWE

CONTAINER
STORAGE

At James Kemball, we are committed to reducing our environmental impact and contributing to a more sustainable future. We recognise that our operations have an impact on the environment, and we strive to minimise it through the following actions:

1. We will reduce our carbon footprint by investing in energy-efficient technologies and renewable energy sources where feasible.
2. We will reduce waste by minimising the use of single-use plastics and promoting recycling in our workplace.
3. We will source materials and products from sustainable and ethical sources whenever possible, and we will work with our suppliers to improve their

- environmental and social practices.
4. We will regularly monitor and report on our environmental performance, and we will continuously seek opportunities to improve our sustainability practices.

We believe that sustainability is not just a business responsibility, but a moral obligation to protect our planet and ensure a better future for generations to come. We pledge to do our part in creating a more sustainable world, and we invite our stakeholders to join us on this journey.

We have built our business on initiative, discipline, experience and knowledge.

SERVICE EXCELLENCE

- Skilled, knowledgeable, experienced team bring you best practice.

GLOBAL NETWORK

- Ability to underpin your supply chain with a variety of additional services.

COLLABORATIVE WORKING

- We work collaboratively with our customers to achieve continuous improvement.
- Maximise value within all container services operations.

CASE STUDY

JCB

JCB is an industry-leading manufacturer of plant and equipment for construction and agricultural industries.

James Kemball has a strong long-term relationship with Metro Shipping who in-turn have worked closely with JCB for over 40 years, supporting JCB with innovation on containerising products across JCB's global manufacturing footprint.

Metro Shipping collaborated closely with JK, utilising their experience & dedicated staff to setup a new cargo operation at our Felixstowe container depot. JK invested in the necessary equipment and sourced experienced staff with in-depth knowledge of the products. This allowed a seamless transfer of the operation to JK's new facility and the continuation of this vital part of JCB's global supply chain. JK operatives undertook extensive training on each piece of equipment, safeguarding operational safety, avoiding any cargo damage.

JK have demonstrated considerable flexibility in this development, and this allowed an increase in activity to support JCB and Metro Shipping to meet their challenges.

Customer Feedback

A multinational fast fashion retailer faced challenges with storage solutions in the UK due to unprecedented volume and demand. They needed to find suitable options before onward delivery to their UK DC network. JK stepped in as a partner and quickly responded with various storage solutions based in the UK, ensuring minimal costs and no disruption to the supply chain.

In 2022, this issue extended to the European supply chain, particularly within the Port of Rotterdam where density problems arose. JK and their partner resolved this by appropriating storage facilities on the mainland using the barge network. This not only reduced carbon emissions but also decreased waiting times at the Port of Rotterdam.

Within just 14 days, JK successfully established a robust network in both the UK and Rotterdam, centrally managed from the UK. The customers' requirements were given utmost consideration, resulting in a streamlined and cost-effective solution.
