

Storage and Project Cargo Centres

kemball.co.uk

FOREWORD

James Kemball Container Services operations commenced in 2017 with one depot and two members of staff. We have since grown to 4 depots and 31 members of staff in 6 years.

Our commitment lies in guaranteeing both the quality of our services and the reliability of our results.

Our strategic plan is to add value to our customers and provide professional, bespoke services to streamline their supply chain.

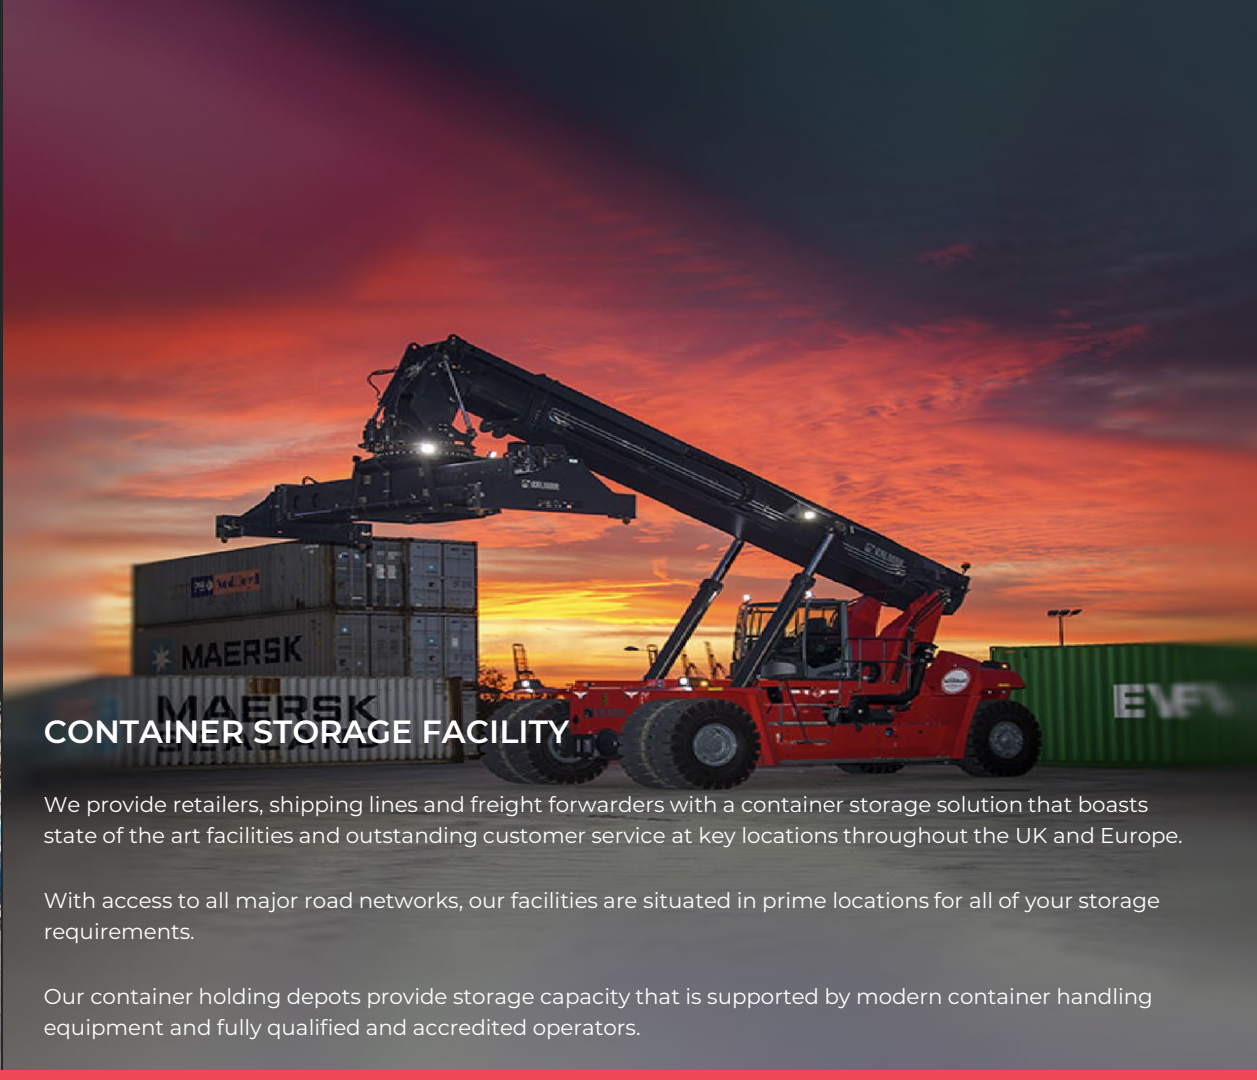

CONTAINER STORAGE FACILITY

We provide retailers, shipping lines and freight forwarders with a container storage solution that boasts state of the art facilities and outstanding customer service at key locations throughout the UK and Europe.

With access to all major road networks, our facilities are situated in prime locations for all of your storage requirements.

Our container holding depots provide storage capacity that is supported by modern container handling equipment and fully qualified and accredited operators.

HEALTH & SAFETY

We regard the management of Health & Safety as an integral part of our business and is designed to contribute to improving business performance. By applying best practice in H&S management, our policy is to ensure that all activities and work carried out will be in a safe manner and our target is for zero accidents. Our employees receive suitable and sufficient training to ensure they are aware of the safe working practices and can carry out their job safely.

SECURITY

We understand the importance of ensuring the safety and security of your cargo. We have invested heavily in high level security including CCTV, fencing and 24/7 manned security patrols.

We use state of the art IT systems and are committed to taking all measures possible to prevent IT security incidents. We maintain and test our Business Continuity Plan and provide appropriate information, instruction and training to all staff members to ensure they are aware of their responsibilities.

ETSF

Our secure and compliant storage facility allows customers ample time to manage customs duty payments while their goods are safely stored. This unique approach empowers customers to defer tax payments until the moment of sale, providing convenient access to their goods.

SHUNTING SERVICES

Our shunting services streamline logistics, enhancing efficiency in cargo transportation. We expertly manage the movement of containers, optimising yard operations. This results in a seamless transfer of goods, reducing transit times and ensuring timely deliveries. Trust us for agile shunting solutions that keep your supply chain in motion.

PROJECT CARGO | OUT OF GAUGE

Our cargo team are dedicated to handling all types of OOG and project cargo, tailored to meet your specific needs.

The Project cargo centres are also able to offer devanning, repacking and cross docking solutions.

We are able to offer competitive rates for all your project cargo needs.

Our expertise extends to managing end to end projects specialising in overheight and overweight cargo.

Your Trusted Partner for End-to-End UK Landside Operations

Our state-of-the-art warehousing and new build container hire operations are equipped to handle the storage and distribution of solar panels with utmost care and efficiency helping you avoid unnecessary costs associated with shipping line detention. With our streamlined transshipment operations, we ensure the smooth transfer of cargo from the import container to the temporary storage solution of your choice whilst ensuring full documented surveys are carried out during this process.

KEY SERVICES

Full UK Project Management: Seamless coordination from arrival to restitution.

Efficient Transport Solutions: From land to site, our transport fleet delivers solar panels safely and on time.

State-of-the-art Facilities: Advanced solar panel and battery storage solutions.

Flexible Delivery Options: Container or curtain-side deliveries tailored to your needs.

ADDITIONAL FEATURES

Advanced Warehousing: Efficient handling and distribution of solar panels, reducing cost from shipping line detention.

Expert Handling: Safe and efficient managements of solar panels and battery storage.

WHY CHOOSE US?

Proven Expertise: Experienced team delivering outstanding results.

Sustainability Focus: Committed to eco-friendly energy solutions.

Customised Solutions: Tailored strategies for your unique project needs.

ISO Accreditation

We are committed to maintaining the highest standards in all aspects of our operations. Our dedication to excellence is reflected in our ISO accreditations:

ISO 14001 for Environmental Management

ISO 45001 for Occupational Health and Safety

ISO 9001 for Quality Management

These certifications demonstrate our commitment to sustainability, employee well-being, and exceptional quality in our services.

VALUES, ETHICS & ENVIRONMENT

VALUES

Service Excellence: Skilled, knowledgeable, experienced team bring you best practises.

Global Network: Ability to underpin your supply chain with a variety of additional services.

Collaborative Working: We work collaboratively with our customers to achieve continuous improvement.

Maximise value within all container solutions.

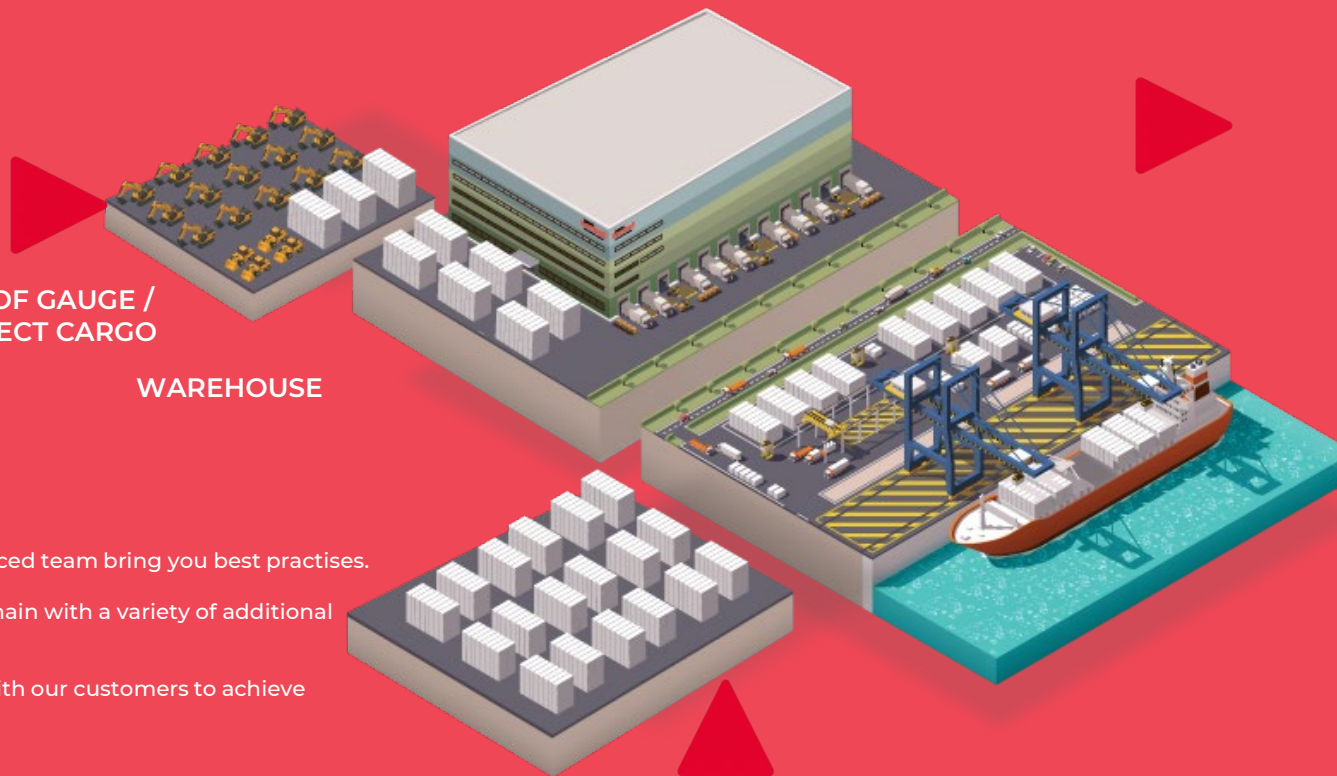

ETHICS & ENVIRONMENT

We are committed to reducing our environmental impact and contributing to a more sustainable future. We recognise that our operations have an impact on the environment, and we strive to minimise it through reducing our carbon footprint, reducing waste, sustainable sourcing and performance monitoring.

CASE STUDY

JCB

JCB is an industry-leading manufacturer of plant and equipment for construction and agricultural industries.

James Kemball has a strong long-term relationship with Metro Shipping who in-turn have worked closely with JCB for over 40 years, supporting JCB with innovation on containerising products across JCB's global manufacturing footprint.

Metro Shipping collaborated closely with JK, utilising their experience & dedicated staff to set-up a new cargo operation at our Felixstowe container depot. JK invested in the necessary equipment and sourced experienced staff with in-depth knowledge of the products. This allowed a seamless transfer of the operation to JK's new facility and the continuation of this vital part of JCB's global supply chain. JK operatives undertook extensive training on each piece of equipment, safeguarding operational safety, avoiding any cargo damage.

JK have demonstrated considerable flexibility in this development, and this allowed an increase in activity to support JCB and Metro Shipping to meet their challenges.

Success Stories

At James Kimball we have a proven track record of partnering with customers to tackle their renewable energy logistics challenges, particularly those related to on-site delays. These customers were facing significant issues with lengthy delays at solar farms, leading to high detention & demurrage charges.

Our skilled team efficiently devanned the solar panels from shipper's containers and reloaded them into our brand-new containers. This process was carefully managed to minimise the risk of damage and ensure quick turnaround times. By utilising our new containers, we ensured the solar panels were securely stored and protected from environmental elements.
